RE: CERCLA, 42 U.S.C. 9604(e), Section 104(e) request.
The South Dayton Dump, Moraine, OH

Dear Ms. Sheppard-Johnson:

The following is the response of ITW Hobart Brothers Company in regards to the Information Request and its questions in Attachment 2 concerning the South Dayton Dump Site (Site) located at 1976 Dryden Road (aka) Springboro Pike, Moraine, Ohio.

ITW acquired Hobart Brothers in 1996. In compliance with the requirements of CERCLA we have reviewed available documents as well as conducted interviews of present and former employees. Because of the changes in ownership and the broad applicable time period, we are unable to determine whether our records are complete. Thus, we intend to continue our good faith search and will supplement this response if we find additional relevant information.

Please direct all questions and correspondence regarding this site to me at:

ITW Hobart Brothers Company is currently not involved in discussions with state or local authorities, engaged in voluntary cleanup action, or involved in any lawsuit regarding this Site. ITW Hobart Brothers does, however, wish to explore negotiating a reasonable resolution of any potential liability with both EPA and other potentially responsible parties for this Site.

By agreeing to work with a PRP group to resolve any potential liabilities, Hobart does not admit any liability nor does it waive any possible defenses to liability in the event the parties fail to reach an agreement.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted.

Based upon my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

PART I

ITEM 1. *Business*

General

Illinois Tool Works Inc. (the "Company" or "ITW") was founded in 1912 and incorporated in 1915. The Company manufactures and markets a variety of products and systems that provide specific, problem-solving solutions for a diverse customer base worldwide. The Company has approximately 600 operations in 43 countries.

The Company's business units are divided into six segments: Engineered Products-North America, Engineered Products-International, Specialty Systems-North America, Specialty Systems-International, Consumer Products, and Leasing and Investments. Businesses in the Engineered Products-North America segment are located in North America and manufacture short lead-time plastic and metal components and fasteners, and specialty products such as polymers, fluid products, and resealable packaging. Businesses in the Engineered Products-International segment are located outside North America and manufacture short lead-time plastic and metal components and fasteners, and specialty products such as polymers, fluid products and electronic component packaging. Businesses in the Specialty Systems-North America segment are located in North America and produce longer lead-time machinery and related consumables, and specialty equipment for applications such as food service and industrial finishing. Businesses in the Specialty Systems-International segment are located outside North America and manufacture longer lead-time machinery and related consumables, and specialty equipment for food service and industrial finishing. Businesses in the Consumer Products segment are located primarily in North America and manufacture specialty exercise equipment, small electric appliances, cookware and ceramic tile. The Leasing and Investment segment makes opportunistic investments in mortgage-related assets, leveraged and direct financing leases of equipment, properties and property developments, and affordable housing.

On November 23, 1999, a wholly owned subsidiary of ITW merged with Premark International, Inc. ("Premark"), a commercial manufacturer of food equipment and laminate products. Shareholders of Premark received .8081 shares of ITW common stock in exchange for each share of Premark common stock outstanding. A total of 49,781,665 of ITW common shares were issued to the former Premark shareholders in connection with the merger. The merger was accounted for under the pooling-of-interests accounting method and accordingly, ITW's historical financial statements for periods prior to the merger have been restated to include the results of operations, financial position and cash flows of Premark, as though the companies had been combined during such periods.

During the five-year period ending December 31, 2000, the Company acquired and disposed of numerous other operations which did not materially impact consolidated results.

Current Year Developments

Refer to pages 21 through 26, Management's Discussion and Analysis, in the Company's 2000 Annual Report to Stockholders.

Financial Information about Segments and Markets

Segment and geographic data are included on pages 21 through 23 and 42 through 44 of the Company's 2000 Annual Report to Stockholders.

The principal markets served by the Company's five manufacturing segments are as follows:

End Markets Served	% of 2000 Operating Revenues by Manufacturing Segment				
	Engineered Products-North America	Engineered Products-International	Specialty Systems-North America	Specialty Systems-International	Consumer Products
Construction	47%	31%	9%	7%	31%
Automotive	26	32	6	3	—
General Industrial	12	15	20	25	—
Food Retail and Service	—	—	33	26	—
Consumer Durables	6	9	2	3	68
Electronics	3	8	2	2	—
Food and Beverage	2	1	8	9	—
Industrial Capital Goods	1	1	5	6	—
Paper Products	—	—	4	5	—
Other	3	3	11	14	1
	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>

Operating results of the segments are described on pages 21 through 23 and 42 through 44 of the Company's 2000 Annual Report to Stockholders.

Most of the Company's businesses distribute their products directly to industrial manufacturers and through independent distributors.

Backlog

Backlog generally is not considered a significant factor in the Company's businesses as relatively short delivery periods and rapid inventory turnover are characteristic of most of its products.

Backlog by manufacturing segment as of December 31, 2000 and 1999 is summarized as follows:

	Backlog in Thousands of Dollars					Total
	Engineered Products-North America	Engineered Products-International	Specialty Systems-North America	Specialty Systems-International	Consumer Products	
2000.....	\$315,000	\$145,000	\$252,000	\$139,000	\$16,000	\$867,000
1999.....	\$257,000	\$125,000	\$196,000	\$136,000	—	\$714,000

Backlog orders scheduled for shipment beyond calendar year 2001 were not material in any manufacturing segment as of December 31, 2000.

The information set forth below is applicable to all industry segments of the Company unless otherwise noted:

Competition

The Company's global competitive environment is complex because of the wide diversity of products the Company manufactures and the markets it serves. Depending on the product or market, the Company may compete with a few other companies or with many others, some of which may be the Company's own licensees.

The Company is a leading producer of plastic, metal and laminate components and fasteners; polymers and fluid products; tooling for specialty applications; welding products; packaging machinery and related consumables; food service equipment; and industrial finishing equipment.

Raw Materials

The Company uses raw materials of various types, primarily metals and plastics that are available from numerous commercial sources. The availability of materials and energy has not resulted in any significant business interruptions or other major problems, nor are any such problems anticipated.

Research and Development

The Company's growth has resulted from developing new and improved products, broadening the application of established products, continuing efforts to improve and develop new methods, processes and equipment, and from acquisitions. Many new products are designed to reduce customers' costs by eliminating steps in their manufacturing processes, reducing the number of parts in an assembly, or by improving the quality of customers' assembled products. Typically, the development of such products is accomplished by working closely with customers on specific applications. Identifiable research and development costs are set forth on page 31 of the Company's 2000 Annual Report to Stockholders.

The Company owns approximately 2,805 unexpired United States patents covering articles, methods and machines. Many counterparts of these patents have also been obtained in various foreign countries. In addition, the Company has approximately 975 applications for patents pending in the United States Patent Office, but there is no assurance that any patent will be issued. The Company maintains an active patent department for the administration of patents and processing of patent applications.

The Company believes that many of its patents are valuable and important. Nevertheless, the Company credits its leadership in the markets it serves to engineering capability; manufacturing techniques, skills and efficiency; marketing and sales promotion; and service and delivery of quality products to its customers.

Trademarks

Many of the Company's products are sold under various trademarks owned or licensed by the Company. Among the most significant are: ITW, Apex, Buildex, Corex, Deltar, Devcon, DeVilbiss, Fastex, Hi-Cone, Hobart, Keps, Magnaflux, Miller, Minigrip, Paktron, Paslode, Precor, Ramset, Ransburg, Red Head, Shakeproof, Signode, Stero, Teks, Tempil, Tenax, Tri-Mark, Vulcan, West Bend, Wilsonart, and Zip-Pak.

Environmental

The Company believes that its plants and equipment are in substantial compliance with applicable environmental regulations. Additional measures to maintain compliance are not expected to materially affect the Company's capital expenditures, competitive position, financial position or results of operations.

Various legislative and administrative regulations concerning environmental issues have become effective or are under consideration in many parts of the world relating to manufacturing processes, and the sale or use of certain products. To date, such developments have not had a substantial adverse impact on the Company's sales or earnings. The Company has made considerable efforts to develop and sell environmentally compatible products resulting in new and expanding marketing opportunities.

Employees

The Company employed approximately 55,300 persons as of December 31, 2000 and considers its employee relations to be excellent.

International

The Company's international operations include subsidiaries, joint ventures and licensees in 42 countries on six continents. These operations serve such markets as construction, automotive, food retail and service, general industrial, and others on a worldwide basis. The Company's international operations contributed approximately 35% of operating revenues in 2000 and 34% in 1999.

Refer to pages 21 through 26 and 42 through 44 in the Company's 2000 Annual Report to Stockholders for additional information on international activities. International operations are subject to certain risks inherent in conducting business in foreign countries, including price controls, exchange controls, limitations on participation in local enterprises, nationalization, expropriation and other governmental action, and changes in currency exchange rates.

Forward-looking Statements

Refer to page 26 of the Company's 2000 Annual Report to Stockholders for information on the risks associated with forward-looking statements within this document.

PART I

ITEM 1. *Business*

General

Illinois Tool Works Inc. (the “Company” or “ITW”) was founded in 1912 and incorporated in 1915. The Company is a worldwide manufacturer of highly engineered products and specialty systems.

The Company has approximately 600 operations in 43 countries which are aggregated and organized for internal reporting purposes into the following five continuing segments:

Engineered Products — North America: Businesses that are located in North America and the manufacture short lead-time plastic and metal components and fasteners, and specialty products such as polymers, fluid products and resealable packaging.

Engineered Products — International: Businesses that are located outside North America and that manufacture short lead-time plastic and metal components and fasteners, and specialty products such as polymers, fluid products and electronic component packaging.

Specialty Systems — North America: Businesses that are located in North America and that produce longer lead-time machinery and related consumables, and specialty equipment for applications such as food service and industrial finishing.

Specialty Systems — International: Businesses that are located outside North America and that manufacture longer lead-time machinery and related consumables, and specialty equipment for applications such as food service and industrial finishing.

Leasing & Investments: Businesses that make opportunistic investments in mortgage-related assets, leveraged and direct financing leases of aircraft and other equipment, properties and property developments, affordable housing and a venture capital fund.

In November 1999, a wholly owned subsidiary of ITW merged with Premark International, Inc. (“Premark”), a commercial manufacturer of food equipment and laminate products. Shareholders of Premark received .8081 shares of ITW common stock in exchange for each share of Premark common stock outstanding. A total of 49,781,665 of ITW common shares were issued to the former Premark shareholders in connection with the merger.

The merger was accounted for under the pooling-of-interests accounting method. Accordingly, ITW’s historical financial statements for periods prior to the merger have been restated to include the results of operations, financial position and cash flows of Premark as though the companies had been combined during such periods.

In December 2001, the Company’s Board of Directors authorized the divestiture of the Consumer Products segment. These businesses became part of ITW in 1999 with the Premark merger. The segment is comprised of the following businesses: Precor specialty exercise equipment, West Bend appliances and premium cookware, and Florida Tile ceramic tile. The Company’s consolidated financial statements have been restated for all periods to present these businesses as discontinued operations in accordance with Accounting Principles Board Opinion No. 30. The Company intends to divest these businesses through sale transactions in 2002 and does not expect to incur a loss on their disposal.

During the five-year period ending December 31, 2001, the Company acquired and disposed of numerous other operations which did not materially impact consolidated results.

Current Year Developments

Refer to pages 25 through 33, Management’s Discussion and Analysis, in the Company’s 2001 Annual Report to Stockholders.

Financial Information about Segments and Markets

Segment and geographic data are included on pages 25 through 29 and 51 through 52 of the Company's 2001 Annual Report to Stockholders.

The principal markets served by the Company's four continuing manufacturing segments are as follows:

End Markets Served	% of 2001 Operating Revenues by Manufacturing Segment			
	Engineered Products-North America	Engineered Products-Inter-national	Specialty Systems-North America	Specialty Systems-Inter-national
Construction	47%	36%	10%	4%
Automotive	29	32	5	3
General Industrial	8	16	22	27
Food Retail and Service	—	—	31	22
Consumer Durables	5	6	3	2
Electronics	4	5	1	1
Food and Beverage	2	1	8	13
Industrial Capital Goods	2	1	6	6
Paper Products	—	—	4	4
Other	3	3	10	18
	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>

Operating results of the segments are described on pages 25 through 29 and 51 through 52 of the Company's 2001 Annual Report to Stockholders.

The Company's manufacturing businesses distribute their products directly to industrial manufacturers and through independent distributors.

Backlog

Backlog generally is not considered a significant factor in the Company's businesses as relatively short delivery periods and rapid inventory turnover are characteristic of most of its products. Backlog by continuing manufacturing segment as of December 31, 2001 and 2000 is summarized as follows:

	Backlog in Thousands of Dollars				
	Engineered Products-North America	Engineered Products-International	Specialty Systems-North America	Specialty Systems-International	Total
2001	\$250,000	\$148,000	\$212,000	\$121,000	\$731,000
2000	\$315,000	\$145,000	\$250,000	\$139,000	\$849,000

Backlog orders scheduled for shipment beyond calendar year 2002 were not material in any manufacturing segment as of December 31, 2001.

The information set forth below is applicable to all industry segments of the Company unless otherwise noted:

Competition

The Company's global competitive environment is complex because of the wide diversity of products the Company manufactures and the many markets it serves. Depending on the product or market, the Company may compete with a few other companies or with many others.

The Company is a leading producer of plastic, metal and laminate components and fasteners; polymers and fluid products; tooling for specialty applications; welding products; packaging machinery and related consumables; food service equipment; and industrial finishing equipment.

Raw Materials

The Company uses raw materials of various types, primarily metals, plastics and paper that are available from numerous commercial sources. The availability of materials and energy has not resulted in any significant business interruptions or other major problems, nor are any such problems anticipated.

Research and Development

The Company's growth has resulted from developing new and improved products, broadening the application of established products, continuing efforts to improve and develop new methods, processes and equipment, and from acquisitions. Many new products are designed to reduce customers' costs by eliminating steps in their manufacturing processes, reducing the number of parts in an assembly, or by improving the quality of customers' assembled products. Typically, the development of such products is accomplished by working closely with customers on specific applications. Identifiable research and development costs are set forth on page 39 of the Company's 2001 Annual Report to Stockholders.

The Company owns approximately 3,000 unexpired United States patents covering articles, methods and machines. Many counterparts of these patents have also been obtained in various foreign countries. In addition, the Company has approximately 1,200 applications for patents pending in the United States Patent Office, but there is no assurance that any patent will be issued. The Company maintains an active patent department for the administration of patents and processing of patent applications.

The Company believes that many of its patents are valuable and important. Nevertheless, the Company credits its leadership in the markets it serves to engineering capability; manufacturing techniques, skills and efficiency; marketing and sales promotion; and service and delivery of quality products to its customers.

Trademarks

Many of the Company's products are sold under various trademarks owned or licensed by the Company. Among the most significant are: ITW, Apex, Bernard, Buildex, Chemtronics, Corex, Deltar, Devcon, DeVilbiss, Dymon, Dynatec, Fastex, Foster, Hi-Cone, Hobart, Keps, LPS, Magna, Magnaflux, Miller, Mima, Minigrip, Paktron, Paslode, Precor, Ramset, Ransburg, Red Head, Rocol, Shakeproof, Signode, Stero, Teks, Tempil, Tenax, Texwipe, Traulsen, Tri-Mark, Vulcan, West Bend, Wilsonart, and Zip-Pak.

Environmental

The Company believes that its plants and equipment are in substantial compliance with applicable environmental regulations. Additional measures to maintain compliance are not expected to materially affect the Company's capital expenditures, competitive position, financial position or results of operations.

Various legislative and administrative regulations concerning environmental issues have become effective or are under consideration in many parts of the world relating to manufacturing processes, and the sale or use of certain products. To date, such developments have not had a substantial adverse impact on the Company's sales or earnings. The Company has made considerable efforts to develop and sell environmentally compatible products resulting in new and expanding marketing opportunities.

Employees

The Company employed approximately 52,000 persons as of December 31, 2001 and considers its employee relations to be excellent.

International

The Company's international operations include subsidiaries, joint ventures and licensees in 42 countries on six continents. These operations serve such markets as construction, automotive, food retail and service, general industrial, and others on a worldwide basis. The Company's international operations contributed approximately 37% of operating revenues in 2001 and 36% in 2000.

Refer to pages 25 through 33 and 51 through 52 in the Company's 2001 Annual Report to Stockholders for additional information on international activities. International operations are subject to certain risks inherent in conducting business in foreign countries, including price controls, exchange controls, limitations on participation in local enterprises, nationalization, expropriation and other governmental action, and changes in currency exchange rates.

Forward-looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 including, without limitation, statements regarding the availability of raw materials and energy, the cost of compliance with environmental regulations, adequacy of internally generated funds, the recoverability of the Company's investment in mortgage-related assets, the meeting of dividend payout objectives, the profitable divestiture of the Consumer Products segment in 2002, Premark's target operating margins, the availability of additional financing and the Company's 2002 forecasts. These statements are subject to certain risks, uncertainties, and other factors, which could cause actual results to differ materially from those anticipated, including, without limitation, the risks described herein. Important factors that may influence future results include (1) a further downturn in the construction, automotive, general industrial, food retail and service, or real estate markets, (2) further deterioration in global and domestic business and economic conditions, particularly in North America, Europe and Australia, (3) an interruption in, or reduction in, introducing new products into the Company's product line, (4) an unfavorable environment for making acquisitions or dispositions, domestic and international, including adverse accounting or regulatory requirements and market value of candidates, and (5) uncertainties arising from the aftermath of the September 11th tragedy.

The executive officers of the Company serve at the pleasure of the Board of Directors. Except for Messrs. Flood, Gresh, Hansen, Ringler, and Sutherland, each of the foregoing officers has been employed by

the Company in various elected executive capacities for more than five years. Mr. Flood was elected Executive Vice President in 2000. He joined the Company in 1976 and has held various management positions within the polymers, fluids and machined components businesses. Mr. Gresh was elected Executive Vice President in 2000. He joined the Company in 1989 and has held various sales, marketing and general management positions with the consumer packaging businesses. Mr. Hansen was elected Executive Vice President in 1998. He joined the Company in 1980 and has held various management positions within the Company's automotive metal fasteners and components businesses. Mr. Ringler was elected Vice Chairman in 1999. He joined Premark International in 1990 where he served as President and Chief Operating Officer until May 1996. He served as Premark International's Chief Executive Officer and President from May 1996 to October 1997, after which he served as Chairman of the Board, Chief Executive Officer and President until Premark International's merger with the Company in November 1999. Mr. Sutherland was elected Senior Vice President in 1998. He joined the Company in 1993 after serving as a senior tax manager with Ernst & Young and has served the Company in various capacities, most recently as Vice President of Leasing and Investments.

ITEM 2. *Properties*

As of December 31, 2001 the Company operated the following plants and office facilities, excluding regional sales offices and warehouse facilities:

	Number of Properties	Floor Space		
		Owned	Leased	Total
		(In millions of square feet)		
Engineered Products — North America	148	7.6	3.8	11.4
Engineered Products — International	106	4.0	1.6	5.6
Specialty Systems — North America	145	8.8	3.5	12.3
Specialty Systems — International	109	6.9	2.4	9.3

Corporate	<u>8</u>	<u>1.5</u>	<u>0.0</u>	<u>1.5</u>
	<u>534</u>	<u>29.3</u>	<u>11.7</u>	<u>41.0</u>

The principal plants outside of the U.S. are in Australia, Belgium, Brazil, Canada, Denmark, France, Germany, Italy, Mexico, Spain, Switzerland and the United Kingdom.

The Company's properties are primarily of steel, brick or concrete construction and are maintained in good operating condition. Productive capacity, in general, currently exceeds operating levels. Capacity levels are somewhat flexible based on the number of shifts operated and on the number of overtime hours worked. The Company adds productive capacity from time to time as required by increased demand. Additions to capacity can be made within a reasonable period of time due to the nature of the businesses.

ITEM 3. *Legal Proceedings*

The United States Environmental Protection Agency has issued a proposed fine of \$1,259,000 against one of the Company's businesses for alleged violation of hazardous waste regulations issued under the Resource Conservation and Recovery Act of 1976. The proposed fine principally relates to activities at a facility in Kansas City that took place prior to ITW's acquisition of the business in July 1998. The Company never operated at the Kansas City facility. The former owners of the business have indemnified ITW with respect to the matter, insofar as it relates to pre-acquisition activities. ITW and the former owners are in current negotiations with The United States Environmental Protection Agency regarding the amount of the fine.

PART I

ITEM 1. *Business*

General

Illinois Tool Works Inc. (the "Company") was founded in 1912 and incorporated in 1915. The Company manufactures and markets a variety of products and systems that provide specific, problem-solving solutions for a diverse customer base worldwide. The Company has more than 400 operations in 35 countries. The Company's business units are divided into five segments: Engineered Products-North America, Engineered Products-International, Specialty Systems-North America, Specialty Systems-International, and Leasing and Investments. Businesses in the Engineered Products-North America segment are located in North America and manufacture short lead-time components and fasteners, and specialty products such as adhesives, resealable packaging and electronic component packaging. Businesses in the Engineered Products-International segment are located outside North America and manufacture short lead-time components and fasteners, and specialty products such as electronic component packaging and adhesives. Businesses in the Specialty Systems-North America segment are located in North America and produce longer lead-time machinery and related consumables, and specialty equipment for applications such as industrial spray coating, quality measurement and static control. Businesses in the Specialty Systems-International segment are located outside North America and manufacture longer lead-time machinery and related consumables, and specialty equipment for industrial spray coating and other applications. The Leasing and Investment segment makes opportunistic investments in mortgage-related assets, leveraged and direct financing leases of equipment, properties and property developments, and affordable housing.

In early 1996, the Company acquired all of the voting stock of Hobart Brothers Company ("Hobart"), a manufacturer of welding products, in exchange for shares of ITW voting common stock. As a result, the Hobart acquisition has been accounted for as a pooling of interests in conformity with Generally Accepted Accounting Principles, specifically paragraphs 46 through 48 of Accounting Principles Board Opinion ("APB") No. 16. Accordingly, the results of operations for Hobart have been included in the Statement of Income as of the beginning of 1996. The impact of Hobart on consolidated operating revenues, net income and net income per share was not significant. Therefore, the 1995 financial statements have not been restated to reflect the acquisition of Hobart.

In late 1996, the Company acquired all of the outstanding common stock of Azon Limited ("Azon"), an Australian manufacturer of strapping and other industrial products. The acquisition has been accounted for as a purchase, and accordingly, the acquired net assets have been recorded at their estimated fair values at the date of acquisition. The results of operations have been included in the Statement of Income from the acquisition date, except for the Azon businesses which were expected to be sold, which were not consolidated at December 31, 1996. During 1997, the Company disposed of the majority of the Azon businesses which were expected to be sold. *Based on the assumption that the Azon acquisition had occurred on January 1, 1996 or January 1, 1995, the Company's pro forma operating revenues, net income and net income per share would not have been significantly different.*

During the five-year period ending December 31, 1998, the Company acquired and disposed of numerous other operations which did not materially impact consolidated results.

Current Year Developments

Refer to pages 16 through 21, Management's Discussion and Analysis, in the Company's 1998 Annual Report to Stockholders.

Financial Information about Industry Segments

Segment and geographic data are included on pages 16 through 18 and 36 through 38 of the Company's 1998 Annual Report to Stockholders.

The principal markets served by the Company's four manufacturing segments are as follows:

	% 1998 of Operating Revenues			
	Engineered Products- North America	Engineered Products- International	Specialty Systems- North America	Specialty Systems- International
Automotive	38%	37%	12%	3%
Construction	27%	33%	15%	8%
General Industrial	14%	10%	30%	37%
Food and Beverage	3%	—%	15%	15%
Industrial Capital Goods	3%	1%	6%	10%
Consumer Durables	8%	7%	4%	3%
Paper Products	1%	—%	7%	10%
Electronics	5%	10%	2%	1%
Other	1%	2%	9%	13%
	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>

Operating results of the segments are described on pages 16 through 18 and 36 through 38 of the Company's 1998 Annual Report to Stockholders.

Most of the Company's businesses distribute their products directly to industrial manufacturers and through independent distributors.

Backlog

Backlog generally is not considered a significant factor in the Company's businesses as relatively short delivery periods and rapid inventory turnover are characteristic of many of its products.

Backlog by manufacturing segment as of December 31, 1998 and 1997 is summarized as follows:

	Backlog in Thousands of Dollars				
	Engineered Products- North America	Engineered Products- International	Specialty Systems- North America	Specialty Systems- International	Total
1998	\$224,000	\$126,000	\$119,000	\$64,000	\$533,000
1997	\$214,000	\$ 72,000	\$128,000	\$82,000	\$496,000

Backlog orders scheduled for shipment beyond calendar year 1999 were not material for any manufacturing segment as of December 31, 1998.

The information set forth below is equally applicable to all segments of the Company unless otherwise noted:

Competition

The Company's global competitive environment is complex because of the wide diversity of products the Company manufactures and the markets it serves. Depending on the product or market, the Company may compete with a few other companies or with many others, some of which may be the Company's own licensees.

The Company is a leading producer of plastic and metal components, fasteners and assemblies; industrial fluids and adhesives; tooling for specialty applications; welding products; packaging machinery and related

consumables; industrial spray coating and static control equipment and systems; and quality measurement equipment and systems.

Raw Materials

The Company uses raw materials of various types, primarily metals and plastics that are available from numerous commercial sources. The availability of materials and energy has not resulted in any business interruptions or other major problems, nor are any such problems anticipated.

Research and Development

The Company's growth has resulted from developing new and improved products, broadening the application of established products, continuing efforts to improve and develop new methods, processes and equipment, and from acquisitions. Many new products are designed to reduce customers' costs by eliminating steps in their manufacturing processes, reducing the number of parts in an assembly, or by improving the quality of customers' assembled products. Typically, the development of such products is accomplished by working closely with customers on specific applications. Identifiable research and development costs are set forth on page 25 of the Company's 1998 Annual Report to Stockholders. Research and development expenditures in 1998 in local currencies were consistent with 1997, however U.S. dollar expenditures decreased in 1998 as a result of the negative impact of foreign currencies against the U.S. dollar.

The Company owns approximately 1,975 unexpired United States patents covering articles, methods and machines. Many counterparts of these patents have also been obtained in various foreign countries. In addition, the Company has approximately 347 applications for patents pending in the United States Patent Office, but there is no assurance that any patent will be issued. The Company maintains an active patent department for the administration of patents and processing of patent applications.

The Company believes that many of its patents are valuable and important. Nevertheless, the Company credits its leadership in the markets it serves to engineering capability; manufacturing techniques, skills and efficiency; marketing and sales promotion; and service and delivery of quality products to its customers.

Trademarks

Many of the Company's products are sold under various trademarks owned or licensed by the Company. Among the most significant are: ITW, Apex, Buildex, Deltar, Devcon, DeVilbiss, Fastex, Hi-Cone, Hobart, Keps, Magnaflux, Miller, Minigrip, Newtec, Oxo, Paktron, Paslode, Powcon, Ramset, Ransburg, Red Head, Shakeproof, Signode, Teks, Tenax and Zip-Pak.

Environmental

The Company believes that its plants and equipment are in substantial compliance with applicable environmental regulations. Additional measures to maintain compliance are not expected to materially affect the Company's capital expenditures, competitive position, financial position or results of operations.

Various legislative and administrative regulations concerning environmental issues have become effective or are under consideration in many parts of the world relating to manufacturing processes, and the sale or use of certain products. To date, such developments have not had a substantial adverse impact on the Company's sales or earnings. The Company has made considerable efforts to develop and sell environmentally compatible products resulting in new and expanding marketing opportunities.

Employees

The Company employed approximately 29,200 persons as of December 31, 1998 and considers its employee relations to be excellent.

International

The Company's international operations include subsidiaries, joint ventures and licensees in 35 countries on six continents. These operations serve such markets as automotive, food and beverage, construction, general industrial, industrial capital goods, electronics, paper products and others on a worldwide basis. The Company's international subsidiaries contributed approximately 36% of operating revenues in both 1998 and 1997.

Refer to pages 16 through 19 and 36 through 38 in the Company's 1998 Annual Report to Stockholders for additional information on international activities. International operations are subject to certain risks inherent in conducting business in foreign countries, including price controls, exchange controls, limitations on participation in local enterprises, nationalization, expropriation and other governmental action, and changes in currency exchange rates.

Year 2000

Refer to page 21 in the Company's 1998 Annual Report to Stockholders for discussion of the effect on the Company of the Year 2000 computer issue.

Forward-looking Statements

Refer to page 21 of the Company's 1998 Annual Report to Stockholders for information on the risks associated with forward-looking statements within this document.

Except for Messrs. Hansen, Kinney, Martin, Speer, Sutherland, and Zentmeyer, each of the foregoing officers has been employed by the Company in various elected executive capacities for more than five years. The executive officers of the Company serve at the pleasure of the Board of Directors. Mr. Hansen joined the Company in 1980 and has held various management positions within the Company's automotive metal fasteners and components businesses. Mr. Kinney joined the Company in 1973 and has served as Senior Vice President and Controller, Operations, and Group Controller of several of the Company's businesses. Mr. Martin joined the Company in 1991 and has held several management positions in the welding businesses.

Mr. Speer joined the Company in 1978 and has held various sales, marketing and general management positions within the construction businesses. Mr. Sutherland joined the Company in 1993 after serving as a senior tax manager with Ernst & Young and has served the Company in various capacities, most recently as Vice President of Leasing and Investments. Mr. Zentmeyer joined Signode Corporation (which was acquired by the Company in 1986) in 1968 and has held various management positions in the industrial packaging businesses.

ITEM 2. *Properties*

As of December 31, 1998 the Company operated the following plants and office facilities, excluding regional sales offices and warehouse facilities:

	Number of Properties	Floor Space		
		Owned	Leased	Total
		(in millions of square feet)		
Engineered Products — North America	122	3.9	2.5	6.4

**REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS
ON SCHEDULE**

To Illinois Tool Works Inc.:

We have audited, in accordance with generally accepted auditing standards, the financial statements included in Illinois Tool Works Inc.'s 1998 Annual Report to Stockholders, incorporated by reference in this Form 10-K, and have issued our report thereon dated January 27, 1999. Our audits were made for the purpose of forming an opinion on those statements taken as a whole. The schedule listed in the accompanying index is the responsibility of the Company's management and is presented for the purpose of complying with the Securities and Exchange Commission's rules and is not part of the basic financial statements. The schedule has been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, fairly states in all material respects the financial data required to be set forth therein in relation to the basic financial statements taken as a whole.

PART I

ITEM 1. *Business*

General

Illinois Tool Works Inc. (the “Company” or “ITW”) was founded in 1912 and incorporated in 1915. The Company manufactures and markets a variety of products and systems that provide specific, problem-solving solutions for a diverse customer base worldwide. The Company has more than 500 operations in 40 countries. The Company’s business units are divided into six segments: Engineered Products-North America, Engineered Products-International, Specialty Systems-North America, Specialty Systems-International, Consumer Products, and Leasing and Investments. Businesses in the Engineered Products-North America segment are located in North America and manufacture short lead-time components and fasteners, and specialty products such as adhesives, resealable packaging and electronic component packaging. Businesses in the Engineered Products-International segment are located outside North America and manufacture short lead-time components and fasteners, and specialty products such as electronic component packaging and adhesives. Businesses in the Specialty Systems-North America segment are located in North America and produce longer lead-time machinery and related consumables, and specialty equipment for applications such as food service and industrial spray coating. Businesses in the Specialty Systems-International segment are located outside North America and manufacture longer lead-time machinery and related consumables, and specialty equipment for food service and industrial spray coating. Businesses in the Consumer Products segment are located primarily in North America and manufacture household products which are used by consumers, including small electric appliances, physical fitness equipment and ceramic tile. The Leasing and Investment segment makes opportunistic investments in mortgage-related assets, leveraged and direct financing leases of equipment, properties and property developments, and affordable housing.

On November 23, 1999, a wholly owned subsidiary of ITW merged with Premark International, Inc. (“Premark”), a commercial manufacturer of food equipment and decorative products. Shareholders of Premark received .8081 shares of ITW common stock in exchange for each share of Premark common stock outstanding. A total of 49,781,665 of ITW common shares were issued to the former Premark shareholders in connection with the merger. The merger was accounted for under the pooling-of-interests accounting method and accordingly, ITW’s historical financial statements for periods prior to the merger have been restated to include the results of operations, financial position and cash flows of Premark, as though the companies had been combined during such periods.

During the five-year period ending December 31, 1999, the Company acquired and disposed of numerous other operations which did not materially impact consolidated results.

Current Year Developments

Refer to pages 21 through 26, Management’s Discussion and Analysis, in the Company’s 1999 Annual Report to Stockholders.

Financial Information about Industry Segments

Segment and geographic data are included on pages 21 through 23 and 42 through 44 of the Company’s 1999 Annual Report to Stockholders.

The principal markets served by the Company's five manufacturing segments are as follows:

	% of 1999 Operating Revenues				
	Engineered Products- North America	Engineered Products- Inter- national	Specialty Systems- North America	Specialty Systems- Inter- national	Consumer Products
Construction	48%	38%	9%	5%	33%
Automotive	27%	34%	6%	3%	—%
General Industrial	11%	11%	19%	24%	—%
Consumer Durables	6%	7%	3%	2%	67%
Electronics	3%	7%	1%	2%	—%
Food and Beverage	2%	—%	9%	9%	—%
Industrial Capital Goods	2%	1%	6%	6%	—%
Food Retail and Service	—%	—%	34%	32%	—%
Paper Products	—%	—%	5%	5%	—%
Other	1%	2%	8%	12%	—%
	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>

Operating results of the segments are described on pages 21 through 23 and 42 through 44 of the Company's 1999 Annual Report to Stockholders.

Most of the Company's businesses distribute their products directly to industrial manufacturers and through independent distributors.

Backlog

Backlog generally is not considered a significant factor in the Company's businesses as relatively short delivery periods and rapid inventory turnover are characteristic of many of its products.

Backlog by manufacturing segment as of December 31, 1999 and 1998 is summarized as follows:

	Backlog in Thousands of Dollars					
	Engineered Products- North America	Engineered Products- International	Specialty Systems- North America	Specialty Systems- International	Consumer Products	Total
1999.....	\$257,000	\$125,000	\$196,000	\$136,000	—	\$714,000
1998.....	\$227,000	\$124,000	\$186,000	\$134,000	—	\$671,000

Backlog orders scheduled for shipment beyond calendar year 2000 were not material in any manufacturing segment as of December 31, 1999.

The information set forth below is applicable to all industry segments of the Company unless otherwise noted:

Competition

The Company's global competitive environment is complex because of the wide diversity of products the Company manufactures and the markets it serves. Depending on the product or market, the Company may compete with a few other companies or with many others, some of which may be the Company's own licensees.

The Company is a leading producer of plastic, metal and laminate components, fasteners and assemblies; industrial fluids and adhesives; tooling for specialty applications; welding products; packaging machinery and related consumables; food service equipment; and industrial spray coating equipment.

Raw Materials

The Company uses raw materials of various types, primarily metals and plastics that are available from numerous commercial sources. The availability of materials and energy has not resulted in any business interruptions or other major problems, nor are any such problems anticipated.

Research and Development

The Company's growth has resulted from developing new and improved products, broadening the application of established products, continuing efforts to improve and develop new methods, processes and equipment, and from acquisitions. Many new products are designed to reduce customers' costs by eliminating steps in their manufacturing processes, reducing the number of parts in an assembly, or by improving the quality of customers' assembled products. Typically, the development of such products is accomplished by working closely with customers on specific applications. Identifiable research and development costs are set forth on page 31 of the Company's 1999 Annual Report to Stockholders.

The Company owns approximately 2,500 unexpired United States patents covering articles, methods and machines. Many counterparts of these patents have also been obtained in various foreign countries. In addition, the Company has approximately 550 applications for patents pending in the United States Patent Office, but there is no assurance that any patent will be issued. The Company maintains an active patent department for the administration of patents and processing of patent applications.

The Company believes that many of its patents are valuable and important. Nevertheless, the Company credits its leadership in the markets it serves to engineering capability; manufacturing techniques, skills and efficiency; marketing and sales promotion; and service and delivery of quality products to its customers.

Trademarks

Many of the Company's products are sold under various trademarks owned or licensed by the Company. Among the most significant are: ITW, Apex, Buildex, Deltar, Devcon, DeVilbiss, Fastex, Hi-Cone, Hobart, Keps, Magnaflux, Miller, Minigrip, Paktron, Paslode, Precor, Ramset, Ransburg, Red Head, Shakeproof, Signode, Teks, Tenax, West Bend, Wilsonart, and Zip-Pak.

Environmental

The Company believes that its plants and equipment are in substantial compliance with applicable environmental regulations. Additional measures to maintain compliance are not expected to materially affect the Company's capital expenditures, competitive position, financial position or results of operations.

Various legislative and administrative regulations concerning environmental issues have become effective or are under consideration in many parts of the world relating to manufacturing processes, and the sale or use of certain products. To date, such developments have not had a substantial adverse impact on the Company's sales or earnings. The Company has made considerable efforts to develop and sell environmentally compatible products resulting in new and expanding marketing opportunities.

Employees

The Company employed approximately 52,800 persons as of December 31, 1999 and considers its employee relations to be excellent.

International

The Company's international operations include subsidiaries, joint ventures and licensees in 39 countries on six continents. These operations serve such markets as construction, food and retail service, general industrial, automotive, and others on a worldwide basis. The Company's international subsidiaries contributed approximately 34% of operating revenues in 1999 and 33% in 1998.

Refer to pages 21 through 24 and 42 through 44 in the Company's 1999 Annual Report to Stockholders for additional information on international activities. International operations are subject to certain risks inherent in conducting business in foreign countries, including price controls, exchange controls, limitations on participation in local enterprises, nationalization, expropriation and other governmental action, and changes in currency exchange rates.

Year 2000

Refer to page 26 in the Company's 1999 Annual Report to Stockholders for discussion of the effect on the Company of the year 2000 computer issue.

Forward-looking Statements

Refer to page 26 of the Company's 1999 Annual Report to Stockholders for information on the risks associated with forward-looking statements within this document.

The principal plants outside of the U.S. are in Australia, Brazil, Canada, Denmark, France, Germany, Italy, Korea, Mexico, Spain, Switzerland and the United Kingdom.

The Company's properties are primarily of steel, brick or concrete construction and are maintained in good operating condition. Productive capacity, in general, currently exceeds operating levels. Capacity levels are somewhat flexible based on the number of shifts operated and on the number of overtime hours worked. The Company adds productive capacity from time to time as required by increased demand. Additions to capacity can be made within a reasonable period of time due to the nature of the businesses.

ITEM 3. *Legal Proceedings*

Not applicable.

ITEM 4. *Submission of Matters to a Vote of Security Holders*

The Company held a Special Meeting of Stockholders on November 23, 1999. At the meeting, the following item was submitted to a vote of stockholders:

The proposal to issue the Company's common stock as stated in the Proxy Statement dated October 12, 1999 pursuant to the Agreement and Plan of Merger among Premark International, Inc., Illinois Tool Works Inc. and CS Merger Sub Inc., a wholly owned subsidiary of ITW, dated as of September 9, 1999. The proposal was approved with 197,508,363 votes for, 4,329,793 votes against and 574,374 votes withheld.

PART I

ITEM 1. *Business*

General

Illinois Tool Works Inc. (the "Company") was founded in 1912 and incorporated in 1915. The Company manufactures and markets a variety of products and systems that provide specific, problem-solving solutions for a diverse customer base worldwide. The Company has more than 365 operations in 34 countries. The Company's business units are divided into three segments: Engineered Components, Industrial Systems and Consumables, and Leasing and Investments. Products in the Company's Engineered Components Segment include short lead-time components and fasteners primarily for automotive, construction and general industrial applications. This segment also manufactures specialty products such as adhesives and static-control equipment. Industrial Systems and Consumables products include longer lead-time machinery and related consumables primarily for food and beverage, construction, automotive and general industrial markets. They also manufacture specialty products for applications such as industrial spray coating and quality measurement. The Leasing and Investment segment makes investments that utilize the Company's cash flow, including mortgage-related investments, leveraged and direct financing leases of equipment, investments in properties and property developments, and affordable housing investments.

In the first quarter of 1993, the Company acquired the Miller Group Ltd. ("Miller"), a manufacturer of arc welding equipment, through an exchange of ITW voting Common Stock for all of the voting Common Stock of Miller. In early 1996, the Company acquired all of the voting stock of Hobart Brothers Company ("Hobart"), a manufacturer of welding products, in exchange for shares of ITW voting common stock. As a result, the Miller and Hobart acquisitions have been accounted for as poolings of interests in conformity with Generally Accepted Accounting Principles, specifically paragraphs 46 through 48 of Accounting Principles Board Opinion ("APB") No. 16. Accordingly, the results of operations for Miller and Hobart have been included in the Statement of Income as of the beginning of 1993 and 1996, respectively. The impact of Miller and Hobart on consolidated operating revenues, net income and net income per share was not significant. Therefore, the 1992 and 1995 financial statements have not been restated to reflect the acquisitions of Miller and Hobart, respectively.

In late 1996, the Company acquired all of the outstanding common stock of Azon Limited ("Azon"), an Australian manufacturer of strapping and other industrial products. The acquisition has been accounted for as a purchase, and accordingly, the acquired net assets have been recorded at their estimated fair values at the date of acquisition. The results of operations have been included in the Statement of Income from the acquisition date, except for the Azon businesses which were expected to be sold, which were not consolidated at December 31, 1996. During 1997, the Company disposed of the majority of the Azon businesses which were expected to be sold. Based on the assumption that the Azon acquisition had occurred on January 1, 1996 or January 1, 1995, the Company's pro forma operating revenues, net income and net income per share would not have been significantly different.

During the five-year period ending December 31, 1997, the Company acquired and disposed of numerous other operations which did not materially impact consolidated results.

Current Year Developments

Refer to pages 18 through 22, Management's Discussion and Analysis, in the Company's 1997 Annual Report to Stockholders.

Financial Information about Industry Segments

The percentage contributions to operating revenues for the last three years by industry segment are as follows:

	<u>Engineered Components</u>	<u>Industrial Systems and Consumables</u>	<u>Leasing and Investments</u>
1997	42%	56%	2%
1996	43%	56%	1%
1995	42%	57%	1%

Segment and geographic data are included on pages 18 through 20 and 26 of the Company's 1997 Annual Report to Stockholders.

The principal markets served by the Company's two manufacturing segments are as follows:

	<u>% of Operating Revenues</u>	
	<u>Engineered Components</u>	<u>Industrial Systems and Consumables</u>
Automotive	39%	11%
Construction	29%	13%
General Industrial	14%	27%
Food and Beverage	—%	16%
Industrial Capital Goods	3%	7%
Consumer Durables	9%	3%
Paper Products	—	7%
Electronics	4%	4%
Other	2%	12%
	<u>100%</u>	<u>100%</u>

Operating results of the segments are described on pages 18 through 20 and 26 of the Company's 1997 Annual Report to Stockholders.

Backlog

Backlog generally is not considered a significant factor in the Company's businesses as relatively short delivery periods and rapid inventory turnover are characteristic of many of its products.

Backlog by manufacturing segment as of December 31, 1997 and 1996 is summarized as follows:

	<u>Backlog in Thousands of Dollars</u>		
	<u>Engineered Components</u>	<u>Industrial Systems and Consumables</u>	<u>Total</u>
1997	\$265,000	\$231,000	\$496,000
1996	\$238,000	\$221,000	\$459,000

Backlog orders scheduled for shipment beyond calendar year 1998 were not material in either manufacturing segment as of December 31, 1997.

The information set forth below is equally applicable to all industry segments of the Company unless otherwise noted.

Competition

The Company's global competitive environment is complex because of the wide diversity of products the Company manufactures and the markets it serves. Depending on the product or market, the Company may compete with a few other companies or with many others, some of which may be the Company's own licensees.

The Company is a leading producer of plastic and metal components, fasteners and assemblies; industrial fluids and adhesives; tooling for specialty applications; welding products; packaging systems and related consumables; industrial spray coating and static control equipment and systems; and quality assurance equipment and systems.

Raw Materials

The Company uses raw materials of various types, primarily metals and plastics that are available from numerous commercial sources. The availability of materials and energy has not resulted in any business interruptions or other major problems, nor are any such problems anticipated.

Research and Development

The Company's growth has resulted from developing new and improved products, broadening the application of established products, continuing efforts to improve and develop new methods, processes and equipment, and from acquisitions. Many new products are designed to reduce customers' costs by eliminating steps in their manufacturing processes, reducing the number of parts in an assembly, or by improving the quality of customers' assembled products. Typically, the development of such products is accomplished by working closely with customers on specific applications. Identifiable research and development costs are set forth on page 27 of the Company's 1997 Annual Report to Stockholders. Research and development expenditures in 1997 in local currencies were consistent with 1996, however U.S. dollar expenditures decreased in 1997 as a result of the negative impact of foreign currencies against the U.S. dollar.

The Company owns approximately 1,770 unexpired United States patents covering articles, methods and machines. Many counterparts of these patents have also been obtained in various foreign countries. In addition, the Company has approximately 333 applications for patents pending in the United States Patent Office, but there is no assurance that any patent will be issued. The Company maintains an active patent department for the administration of patents and processing of patent applications.

The Company believes that many of its patents are valuable and important. Nevertheless, the Company credits its leadership in the markets it serves to engineering capability; manufacturing techniques, skills and efficiency; marketing and sales promotion; and service and delivery of quality products to its customers.

Trademarks

Many of the Company's products are sold under various trademarks owned or licensed by the Company. Among the most significant are: ITW, Apex, Buildex, Deltar, Devcon, DeVilbiss, Fastex, Hi-Cone, Hobart, Keps, Magnaflux, Miller, Minigrip, Newtec, Oxo, Paktron, Paslode, Powcon, Ramset, Ransburg, Red Head, Shakeproof, Signode, Teks, Tenax and Zip-Pak.

Environmental

The Company believes that its plants and equipment are in substantial compliance with applicable environmental regulations. Additional measures to maintain compliance are not expected to materially affect the Company's capital expenditures, competitive position, financial position or results of operations.

Various legislative and administrative regulations concerning environmental issues have become effective or are under consideration in many parts of the world relating to manufacturing processes, and the sale or use of certain products. To date, such developments have not had a substantial adverse impact on the Company's sales or earnings. The Company has made considerable efforts to develop and sell environmentally compatible products resulting in new and expanding marketing opportunities.

Employees

The Company employed approximately 25,700 persons as of December 31, 1997 and considers its employee relations to be excellent.

International

The Company's international operations include subsidiaries, joint ventures and licensees in 34 countries on six continents. These operations serve such markets as automotive, food and beverage, construction, general industrial, industrial capital goods and others on a worldwide basis. The Company's international subsidiaries contributed approximately 36% of operating revenues in 1997 and 1996.

Refer to pages 18 through 22 in the Company's 1997 Annual Report to Stockholders for additional information on international activities. International operations are subject to certain risks inherent in conducting business in foreign countries, including price controls, exchange controls, limitations on participation in local enterprises, nationalization, expropriation and other governmental action, and changes in currency exchange rates.

Year 2000

Refer to page 22 in the Company's 1997 Annual Report to Stockholders for discussion of the effect on the Company of the Year 2000 computer issue.

**REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS
ON SCHEDULE**

To Illinois Tool Works Inc.:

We have audited, in accordance with generally accepted auditing standards, the financial statements included in Illinois Tool Works Inc.'s 1997 Annual Report to Stockholders, incorporated by reference in this Form 10-K, and have issued our report thereon dated January 27, 1998. Our audits were made for the purpose of forming an opinion on those statements taken as a whole. The schedule listed in the accompanying index is the responsibility of the Company's management and is presented for the purpose of complying with the Securities and Exchange Commission's rules and is not part of the basic financial statements. The schedule has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, fairly states in all material respects the financial data required to be set forth therein in relation to the basic financial statements taken as a whole.

PART I

ITEM 1. *Business*

General

Illinois Tool Works Inc. (the "Company") was founded in 1912 and incorporated in 1915. The Company manufactures and markets a variety of products and systems that provide specific, problem-solving solutions for a diverse customer base worldwide. The Company has more than 365 operations in 34 countries. The Company's business units are divided into three segments: Engineered Components, Industrial Systems and Consumables, and Leasing and Investments. Products in the Company's Engineered Components segment include short lead-time plastic and metal components, fasteners and assemblies; industrial fluids and adhesives; fastening tools; and welding products. Industrial Systems and Consumables' products include longer lead-time systems and related consumables for consumer and industrial packaging; marking, labeling and identification systems; industrial spray coating equipment and systems; and quality assurance equipment and systems. Leasing and Investments' activities consist of making opportunistic investments that optimally utilize the Company's cash flow and provide high returns.

In the first quarter of 1993, the Company acquired the Miller Group Ltd. ("Miller"), a manufacturer of arc welding equipment, through an exchange of ITW voting Common Stock for all of the voting Common Stock of Miller. In early 1996, the Company acquired all of the voting stock of Hobart Brothers Company ("Hobart"), a manufacturer of welding products, in exchange for shares of ITW voting common stock. As a result, the Miller and Hobart acquisitions have been accounted for as poolings of interests in conformity with Generally Accepted Accounting Principles, specifically paragraphs 46 through 48 of Accounting Principles Board Opinion ("APB") No. 16. The impact of Miller and Hobart on consolidated operating revenues, net income and net income per share was not significant. Therefore, the 1992 and 1995 financial statements have not been restated to reflect the acquisitions of Miller and Hobart, respectively. The results of operations for Miller and Hobart have been included in the Statement of Income as of the beginning of 1993 and 1996, respectively.

In late 1996, the Company acquired all of the outstanding common stock of Azon Limited ("Azon"), an Australian manufacturer of strapping and other industrial products. The acquisition has been accounted for as a purchase, and accordingly, the acquired net assets have been recorded at their estimated fair values at the date of acquisition. The results of operations have been included in the Statement of Income from the acquisition date, except for the Azon businesses which are expected to be sold, which have not been consolidated. Based on the assumption that the Azon acquisition had occurred on January 1, 1996 or January 1, 1995, the Company's pro forma operating revenues, net income and net income per share would not have been significantly different.

During the five-year period ending December 31, 1996, the Company acquired and disposed of numerous other operations which did not materially impact consolidated results.

Current Year Developments

Refer to pages 20 through 23, Management's Discussion and Analysis, in the Company's 1996 Annual Report to Stockholders.

Financial Information about Industry Segments

The percentage contributions to operating revenues for the last three years by industry segment are as follows:

	<u>Engineered Components</u>	<u>Industrial Systems and Consumables</u>	<u>Leasing and Investments</u>
1996	55%	44%	1%
1995	50%	49%	1%
1994	53%	47%	—

Segment and geographic data are included on pages 20 through 22 and 38 of the Company's 1996 Annual Report to Stockholders.

The principal markets served by the Company's two manufacturing segments are as follows:

	<u>% of Operating Revenues</u>	
	<u>Engineered Components</u>	<u>Industrial Systems and Consumables</u>
Construction	30%	7%
Automotive	29%	9%
General Industrial	18%	27%
Food and Beverage	1%	21%
Industrial Capital Goods	4%	11%
Consumer Durables	7%	4%
Paper Products	—	9%
Electronics	7%	2%
Other	4%	10%
	<u>100%</u>	<u>100%</u>

Operating results of the segments are described on pages 20 through 22 and 38 of the Company's 1996 Annual Report to Stockholders.

Backlog

Backlog generally is not considered a significant factor in the Company's businesses as relatively short delivery periods and rapid inventory turnover are characteristic of many of its products.

Backlog by manufacturing segment as of December 31, 1996 and 1995 is summarized as follows:

	<u>Backlog in Thousands of Dollars</u>		
	<u>Engineered Components</u>	<u>Industrial Systems and Consumables</u>	<u>Total</u>
1996	\$272,000	\$187,000	\$459,000
1995	\$236,000	\$213,000	\$449,000

Backlog orders scheduled for shipment beyond calendar year 1997 were not material in either industry segment as of December 31, 1996.

The following information is equally applicable to all industry segments of the Company unless otherwise noted:

Competition

The Company's global competitive environment is complex because of the wide diversity of products the Company manufactures and the markets it serves. Depending on the product or market, the Company may

compete with a few other companies or with many others, some of which may be the Company's own licensees.

The Company is a leading producer of plastic and metal components, fasteners and assemblies; industrial fluids and adhesives; tooling for specialty applications; welding products; packaging systems and related consumables; industrial spray coating and static control equipment and systems; and quality assurance equipment and systems.

Raw Materials

The Company uses raw materials of various types, primarily metals and plastics that are available from numerous commercial sources. The availability of materials and energy has not resulted in any business interruptions or other major problems, nor are any such problems anticipated.

Research and Development

The Company's growth has resulted from developing new and improved products, broadening the application of established products, continuing efforts to improve and develop new methods, processes and equipment, and from acquisitions. Many new products are designed to reduce customers' costs by eliminating steps in their manufacturing processes, reducing the number of parts in an assembly, or by improving the quality of customers' assembled products. Typically, the development of such products is accomplished by working closely with customers on specific applications. Identifiable research and development costs determined in accordance with generally accepted accounting principles are set forth on page 27 of the Company's 1996 Annual Report to Stockholders.

The Company owns approximately 1,700 unexpired United States patents covering articles, methods and machines. Many counterparts of these patents have also been obtained in various foreign countries. In addition, the Company has approximately 355 applications for patents pending in the United States Patent Office, but there is no assurance that any patent will be issued. The Company maintains an active patent department for the administration of patents and processing of patent applications.

The Company licenses some of its patents to other companies, from which the Company collects royalties. The Company believes that many of its patents are valuable and important. Nevertheless, the Company credits its leadership in the markets it serves to engineering capability; manufacturing techniques, skills and efficiency; marketing and sales promotion; and service and delivery of quality products to its customers.

Trademarks

Many of the Company's products are sold under various trademarks owned or licensed by the Company. Among the most significant are: ITW, Signode, Apex, Buildex, Deltar, Devcon, DeVilbiss, Fastex, Hi-Cone, Hobart, Keps, Magnaflux, Miller, Minigrip, Newtec, Oxo, Paktron, Paslode, Powcon, Ramset, Ransburg, Red Head, Shakeproof, Teks, Tenax and ZipPak.

Environmental Compliance

The Company believes that its plants and equipment are in substantial compliance with applicable environmental regulations. Additional measures to maintain compliance are not expected to affect materially the Company's capital expenditures, competitive position, financial position or results of operations.

Various legislative and administrative regulations concerning environmental issues have become effective or are under consideration in many parts of the world relating to manufacturing processes, and the sale or use of certain products. To date, such developments have not had a substantial adverse impact on the Company's sales or earnings. The Company has made considerable efforts to develop and sell environmentally compatible products resulting in new and expanding marketing opportunities.

Employees

The Company employed approximately 24,400 persons as of December 31, 1996 and considers its employee relations to be excellent.

International

The Company's international operations include subsidiaries, joint ventures and licensees in 33 countries on six continents. These operations serve such markets as automotive, food and beverage, construction, general industrial, industrial capital goods and others on a worldwide basis. The Company's international subsidiaries contributed approximately 36% and 38% of operating revenues in 1996 and 1995, respectively.

Refer to pages 20 through 23 in the Company's 1996 Annual Report to Stockholders for additional information on international activities. International operations are subject to certain risks inherent in conducting business in foreign countries, including price controls, exchange controls, limitations on participation in local enterprises, nationalization, expropriation and other governmental action, and changes in currency exchange rates.

News Release

ITW Reports a 3 Percent Decrease in Diluted Income Per Share from Continuing Operations in 2002 First Quarter; Revenues Decline 4 percent During the Period

GLENVIEW, ILLINOIS—(April 17, 2002)—Illinois Tool Works Inc. (NYSE:ITW) today reported that 2002 first quarter income per share from continuing operations excluding goodwill amortization declined 3 percent compared to the prior year period. During the 2002 first quarter, operating revenues decreased 4 percent. On a comparable basis excluding goodwill amortization, income from continuing operations in the 2002 first quarter was \$194.4 million, or 63 cents per share, versus \$199.0 million, or 65 cents per share in the 2001 first quarter.

The modest decline in first quarter income from continuing operations occurred against a backdrop of mildly improving North American end markets, softening International end markets and continuing restructuring for a number of ITW businesses. For the 2002 first quarter, operating revenues were \$2.205 billion compared with \$2.296 billion for the year earlier period.

A required change in accounting resulted in a non-cash charge to earnings in first quarter 2002 of \$221.9 million, or 72 cents per share on a fully diluted basis. This charge is the cumulative impact of evaluating goodwill for impairment based on the new fair value method as required by Statement of Financial Accounting Standards 142. This amount represents 10 percent of the Company's goodwill and other intangibles. As a result of this required accounting change, the Company recorded a net loss of \$23.4 million or minus 8 cents per share for the first quarter.

The Company's cash generation from operations continued to be strong in the most recent quarter and reflected reduced working capital and capital expenditures as a result of the mixed economy. For the first quarter, free operating cash flow was approximately \$263 million on income from continuing operations of \$194 million.

"We believe the first quarter may prove to be meaningful because it represented modest improvement in some of our North American end markets," said W. James Farrell, chairman and chief executive officer. "Base business revenues moved from minus 9 percent in the fourth quarter of last year to minus 6 percent for the just concluded first quarter. Our ability to improve margins 40 basis points was directly tied to reducing our SG&A costs 5 percent for the quarter."

Segment highlights include:

North American Engineered Products revenues declined 1 percent mainly due to weakness in the industrial plastics and metals, construction, electronics and electronic component packaging businesses. Operating income grew 14 percent principally as a result of strength in businesses associated with the automotive and construction end markets. As a result, operating margins were up 220 basis points.

International Engineered Products revenues and operating income decreased 8 percent and 26 percent, respectively, mainly due to weakness in base businesses serving the

automotive and general industrial sectors as well as the impact of an asset writedown and currency translation. Operating margins declined 200 basis points.

North American Specialty Systems revenues declined 2 percent as base business decreases in the industrial packaging, food equipment and finishing units offset positive contributions from the welding businesses. Operating income grew 2 percent as positive contributions from the food equipment, welding and industrial packaging businesses offset restructuring charges for various businesses. Operating margins were up 50 basis points.

International Specialty Systems revenues and operating income declined 9 percent and 20 percent, respectively, largely due to weakness in the industrial packaging and finishing businesses as well as the impact of currency translation. Operating margins declined 110 basis points.

Leasing and Investments operating income was down 26 percent due to gains on sales of investment properties that were realized in the first quarter of 2001.

Looking ahead, the Company expects some sequential improvement in end markets and associated base business for the 2002 second quarter. As a result, the Company projects second quarter 2002 diluted earnings per share for continuing operations to be in the range of 77 cents to 87 cents. For full-year 2002, the Company is forecasting diluted earnings per share for continuing operations to be in the range of \$2.95 to \$3.25 based on expected improving economic trends in the second half of the year.

This First Quarter 2002 Earnings Release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 including, without limitation, statements regarding end market conditions in the second quarter and second half of 2002 and the Company's related earnings forecasts. These statements are subject to certain risks, uncertainties, and other factors, which could cause actual results to differ materially from those anticipated. Important factors that could cause actual results to differ materially from the Company's expectations are set forth on page four of ITW's Form 10-K for 2001.

ITW is a \$9.3 billion diversified manufacturer of highly engineered components and industrial systems and consumables. The Company consists of approximately 600 decentralized operations in 43 countries and employs some 52,000 people.
